Moms Clean Air Force THANKS New Hampshire Senator Ayotte for her support of America’s Clean Power Plan

On behalf of parents around the country, we thank Senator Ayotte for her support of America’s Clean Power Plan. It is an important step in protecting our children’s health and future.

Senator Ayotte has shown leadership in addressing climate pollution and she is positioning New Hampshire to take advantage of a new energy revolution. She has put her concern for New Hampshire families right in front--where it belongs.

America's Clean Power Plan is the first-ever national curb on the most significant driver of human-caused climate pollution: carbon dioxide emissions. America’s Clean Power Plan will stimulate the deployment of clean, reliable and affordable energy sources. In New Hampshire, climate change caused by carbon pollution is threatening the public health and economic well-being of the state. Implementation of America’s Clean Power Plan will result in fewer extreme weather events, fewer health problems for children and minorities, and reduced economic risk to businesses. In a state where almost 25,000 children suffer from asthma, America's Clean Power Plan is a historic first step in addressing the heat waves, rising pollen counts, and urban smog that can trigger asthma attacks.

The success of America’s Clean Power Plan depends upon the participation of every state in the union. Senator Ayotte’s leadership will help New Hampshire take advantage of the many tools available now to cut our greenhouse gas emissions, from increasing energy efficiency to retrofitting power plants. Carbon pollution threatens our children, our communities, and our way of life. On behalf of our over 570,000 members--nearly 4,000 in New Hampshire--Moms Clean Air Force thanks Senator Ayotte for her support of America’s Clean Power plan.
