Mercury standards under attack: The Mercury and Air Toxics Standards are a lifesaving, fully implemented, effective pollution prevention program that specifically protects pregnant women and babies from harm. Since 2012, the mercury standards have helped to dramatically lower mercury emissions from coal plants. Moms want to know: Why is Trump’s EPA trying to make it easier to add mercury to our air?

- 11,000 lives saved each year in the United States due to pollution controls required by mercury standards.
- 130,000 asthma attacks prevented each year in the United States due to mercury standards.
- >80 toxic power plant pollutants targeted by the mercury standards.
