

MERCURY POLLUTION IN NEW MEXICO

Mercury standards under attack: The Mercury and Air Toxics Standards are a lifesaving, fully implemented, effective pollution prevention program that specifically protects pregnant women and babies from harm. Since 2012, the mercury standards have helped to dramatically lower mercury emissions from coal plants.

New Mexico moms want to know:

Why is Trump's EPA trying to make it easier to add mercury to our air?

What does this mean for New Mexico?

3

Number of coal plants in New Mexico that have reduced mercury and air toxics pollution as a result of mercury standards.

84%

Amount that mercury pollution has decreased in New Mexico since 2011.

36

Bodies of water with fish advisories across New Mexico due to mercury contamination.

\$200 million

Amount of health benefits to New Mexicans each year due to mercury standards.

What does this mean for the United States?

11,000

Number of lives saved each year in the United States due to pollution controls required by mercury standards.

81%

Decline in mercury pollution in the United States since 2011.

>80

Number of toxic power plant pollutants targeted by the mercury standards.

130,000

Number of asthma attacks prevented each year in the United States due to mercury standards.
